DETAILED ACTION

1. An action on the merits of claims 1-13 considered readable on Species A (Figures 1-6) is included in this office action with claims 14-17 being withdrawn from consideration. 37 C.F.R. § 1.142(b). Election was made with traverse.

The species are considered to be patentably distinct as claimed.

The requirement is still deemed proper and is therefore made FINAL.

- 2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 3. The submitted prior art has been considered and made of record on submitted Form PTO-1449.
- 4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ruger(DE019740143A1).

See Figures 1-3.

Applicants should note that the examiner has requested a translation of the above applied non-English reference from STIC within the USPTO and intends to attach

Art Unit: 3683

translation with the next office action, if available. Should applicant obtain translation independently of the USPTO, a copy of it should be forwarded to the examiner for inclusion in the file.

6. Claims 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Lasier et al(4040144).

See Figures 2-4 with spring 23 and pistons.

7. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Lan(US5477589).

Note column 1, lines 6-15, which disclose that the Lan device is hydraulic or pneumatic.

The present invention relates to a piston-type door closer with multiple stages of adjustable door closing speeds. More specifically, the present invention relates to a generally cylindrically-shaped piston-type door closer for automatically closing an opened door which is operable by means of 10 pneumatic or hydraulic forces and whose door closing speeds can be conveniently adjusted. Furthermore, the present invention allows the door to be operated at multiple stages of door closing speeds, and the door closing speed at each stage can be conveniently and separately adjusted.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas C. Butler whose telephone number is 703-308-2575. The examiner can normally be reached on m-f 5:30 am to 2pm.

The fax phone number for the organization where this application or proceeding is

assigned is 703-872-9306.
